Bug 66283 - BOM with CRD failed to process new BOMMAT update

Bug 66447 - Menu: 4.3.01 Wiki link should be at root level

Bug 66503 - Search menu selection items does not match actual selected items in iFactory Yield Report

Bug 67602 - IM01598373 - Order Conversion Error When Performing No Order To Planned Order

Bug 68111 - ALM ID 2994 - Menu 4.3 - Wiki link not considering http in menu link

Bug 68245 - IM01603018- Slowness at IFactory Assemble Station

3. Data Importer | Planned Order Mass Upload

Released in Version: 4.3.01

Module: MES VSTS ID: 65278 Tags:

The Data Importer tool, now has the ability to mass upload Planned Orders. A file from SAP that contains multiple planned orders can be reviewed and cleaned prior to uploading to iFactory reducing the manual creation of Planned orders.

Related Feature: 62666

4. Menu Permissions

Released in Version: 4.3.01

Module: MES VSTS ID: 65276 Tags:

iFactory Navigation Menu now has the ability to hide menu items if user does not have permissions to specific screens. This allows the user's menu to remain uncluttered and only displays pages where the user has permission to access.

Note: Some Screen will not have permissions available. Refer to Wiki for a list of screens with no permissions:
